Keyscan LUNA™
1 to 6 door access control

dormakaba

Total control for single door access

Keyscan LUNA is a cost-effective access control solution specifically designed for 1 to 6 door installations.

The Single Door Access Control Unit (SDAC) is designed to secure one door with up to two readers and one electric strike or electromagnetic lock. The unit functions on a WiFi point-to-point or WLAN with a PC laptop running LUNA software.

The combination of access control units and comprehensive software, together with low computer overhead, helps make access control accessible and affordable for small businesses. Security, accountability, user management and reporting are now available at a fraction of the cost of comparable enterprise systems.

LUNA Software Capabilities:

- People Management: manage users, assign credentials and permissions
- Hardware Management: install, configure and operate up to 6 SDAC control units
- Settings: adjust performance and preferences
- Access levels: set permission levels and user groups
- Schedules: for pre-authorized entry times including holiday schedule settings
- Transaction reports: for select or full system usage and transactions for audits and investigations

LUNA Software Benefits:

- Comprehensive and easy to use
- Encrypted database
- Software for small business access control needs
- Downloadable and can be run from a USB drive
- No licensing or recurring fees

Join an upcoming live webinar to learn more!

Our 60-minute Keyscan LUNA training course provides an overview of the functionality, features and requirements to install and configure a complete LUNA access control system.

Training highlights include:

- Features and Benefits of Keyscan LUNA
- Overview of SDAC Hardware and LUNA Software
- Configuring of the SDAC Hardware

Next Webinar: Friday, July 19, 2019 @ 11am EST
